

EasySave - One Page User Guide (EN)

1. Launch

Inside the application folder:

- double-click `EasySave.exe`

Optional command mode:

```
EasySave.exe "1-3"  
EasySave.exe "1;3;5"
```

2. Quick workflow

1. `New job`
2. Fill `Name`, `Source`, `Destination`, `Type`
3. `Save`
4. Select one or more jobs
5. `Run selection` or `Run all`
6. Control runtime using `Start`, `Pause`, `Cancel`

For an illustrated visual guide:

- `docs/user-guide/en/EasySave_GUI_User_Guide.html`
- `docs/user-guide/en/EasySave_GUI_User_Guide.pdf`

3. Backup types

- `Full` : copies all files
- `Differential` : copies missing or newer files only

4. Critical settings

Setting	Values	Impact
Language	<code>en</code> , <code>fr</code>	UI language
Log format	<code>Json</code> , <code>Xml</code>	Log format
Log storage mode	<code>Local</code> , <code>Docker</code> , <code>Both</code>	Log destination
Business software to block	Process name	Auto-pause when process is running

Setting	Values	Impact
File extensions to encrypt	free list separated by commas	CryptoSoft encryption
Priority file extensions	free list separated by commas	Cross-job priority
File size not to back up in parallel (KB)	integer ≥ 0	Large-file serialization threshold

Extensions note:

- plain text list, not strict CSV formatting
- example: `.txt, txt, .log`

5. Useful paths (Windows)

- Config: `%APPDATA%\EasySave\userdata\userconfig.json`
- Jobs: `%APPDATA%\EasySave\Jobs\jobs.json`
- Live state: `%APPDATA%\EasyLog\Progress\state.json`
- Local logs: `%APPDATA%\EasyLog\Logs\log-YYYY-MM-DD.json|xml`
- CryptoSoft (user package): `Resources\CryptoSoft.exe`

6. Quick troubleshooting

- Encryption missing: verify `Resources\CryptoSoft.exe` + configured extensions.
- Jobs stuck paused: check business process + clear manual pause.
- No Docker logs: check `Docker/Both` mode + active log server.
